

Twinning Project UA 17 ENI EC 01 18

Strengthening the capacity of the Ukrainian National Standardization Body

UKRAINE - GERMANY, AUSTRIA, ROMANIA and SPAIN

International Forum for Technical Regulation
Kyiv, 09th October 2018

Key Data

Overall objective(s)

Improve Ukraine's business climate, competitiveness, innovation and integration into the European Union's internal market by improving its national quality infrastructure.

Specific objective

Establish a system of standardization compatible with EU standardization system, thus supporting the implementation of Association Agreement / Deep and Comprehensive Free Trade Area (AA/DCFTA) provisions in the area of technical barriers to trade (TBTs).

Contribution to Association Agreement

This action is specifically meant to assist Ukraine in achieving trade and economic objectives as established in the AA/DCFTA.

Start: 29.10.2018

End: 28.10.2020

Budget: 1 Mio. EUR

Twinning: Institutional cooperation, bringing together public sector expertise from EU Members and EU Neighbors by peer-to-peer activities towards transposition OR approximation of EU law

Vision and Strategy

The Twinning project will support Ukraine to establish a standardization environment that directs national legislation to be in line with the European standardization system and that facilitates participation in international standardization in line with good practices.

The Ukrainian NSB considers its responsibility to develop the environment together with all relevant stakeholders.

The Twinning team will intensely accompany the necessary change processes and promote the principles of collaboration and co-creation within the overall standardization environment.

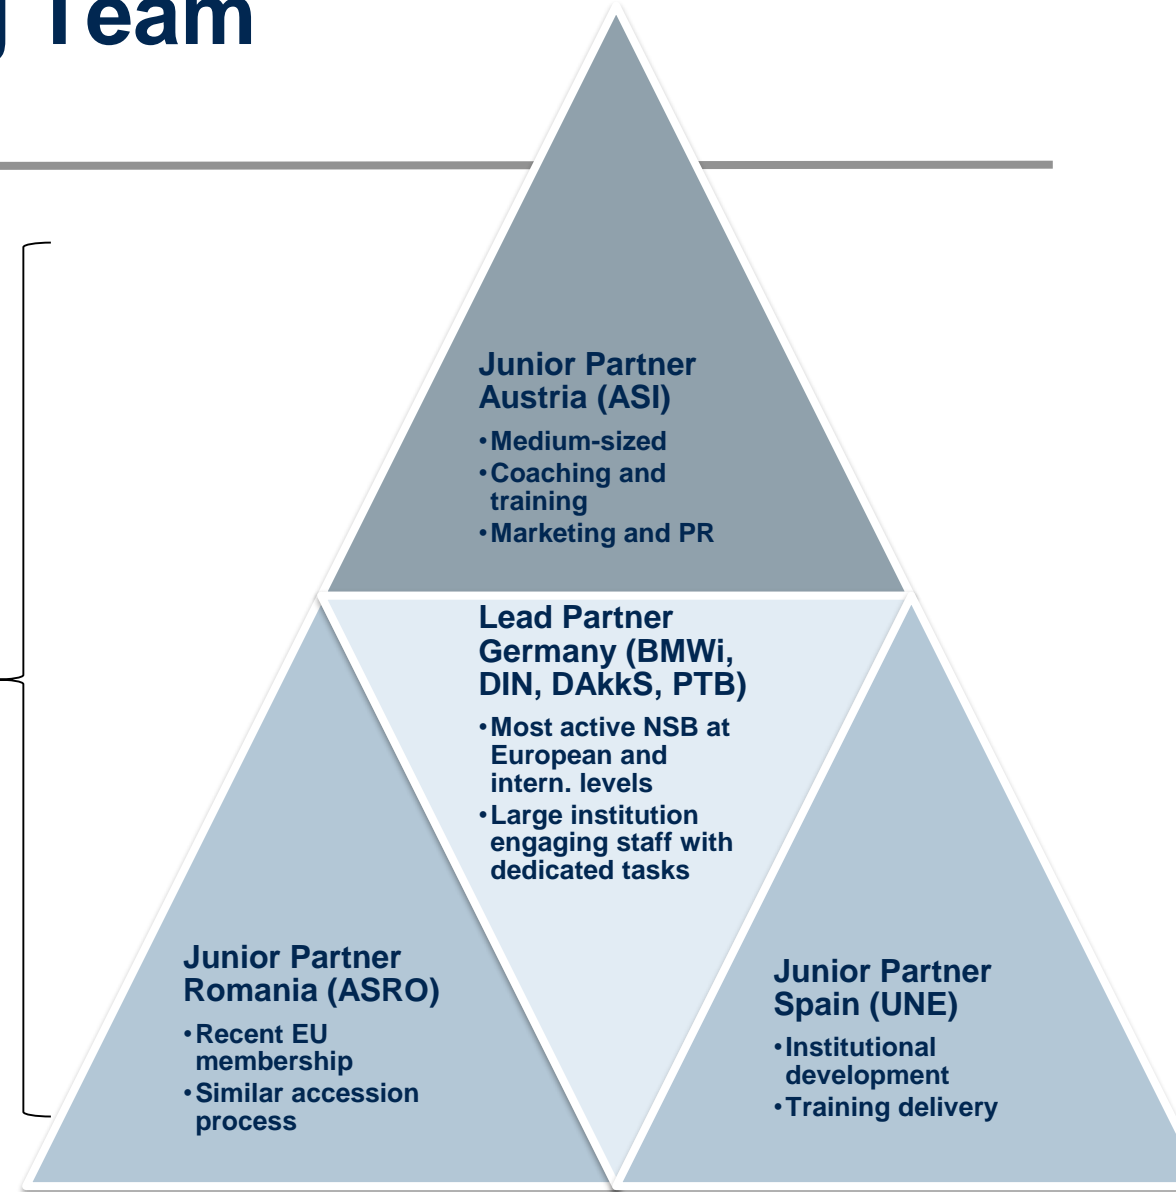

Means / Method of Implementation

100 Experts Mission, 2 Study Visits to EU Member States and 8 Quarterly Steering Committee Meetings

Comprehensive Twinning Team

Administrative and financial management by PTB

Component 1. Legislative Harmonisation with EU Acquis

1.1. Analysis of the legal framework

- Analysis of existing legal framework
- Assessment of current practical implementation
- Status of alignment with EU framework

1.2 Consultations with stakeholders

- Exchanges with other relevant stakeholders
- Development and joint discussions of recommendations

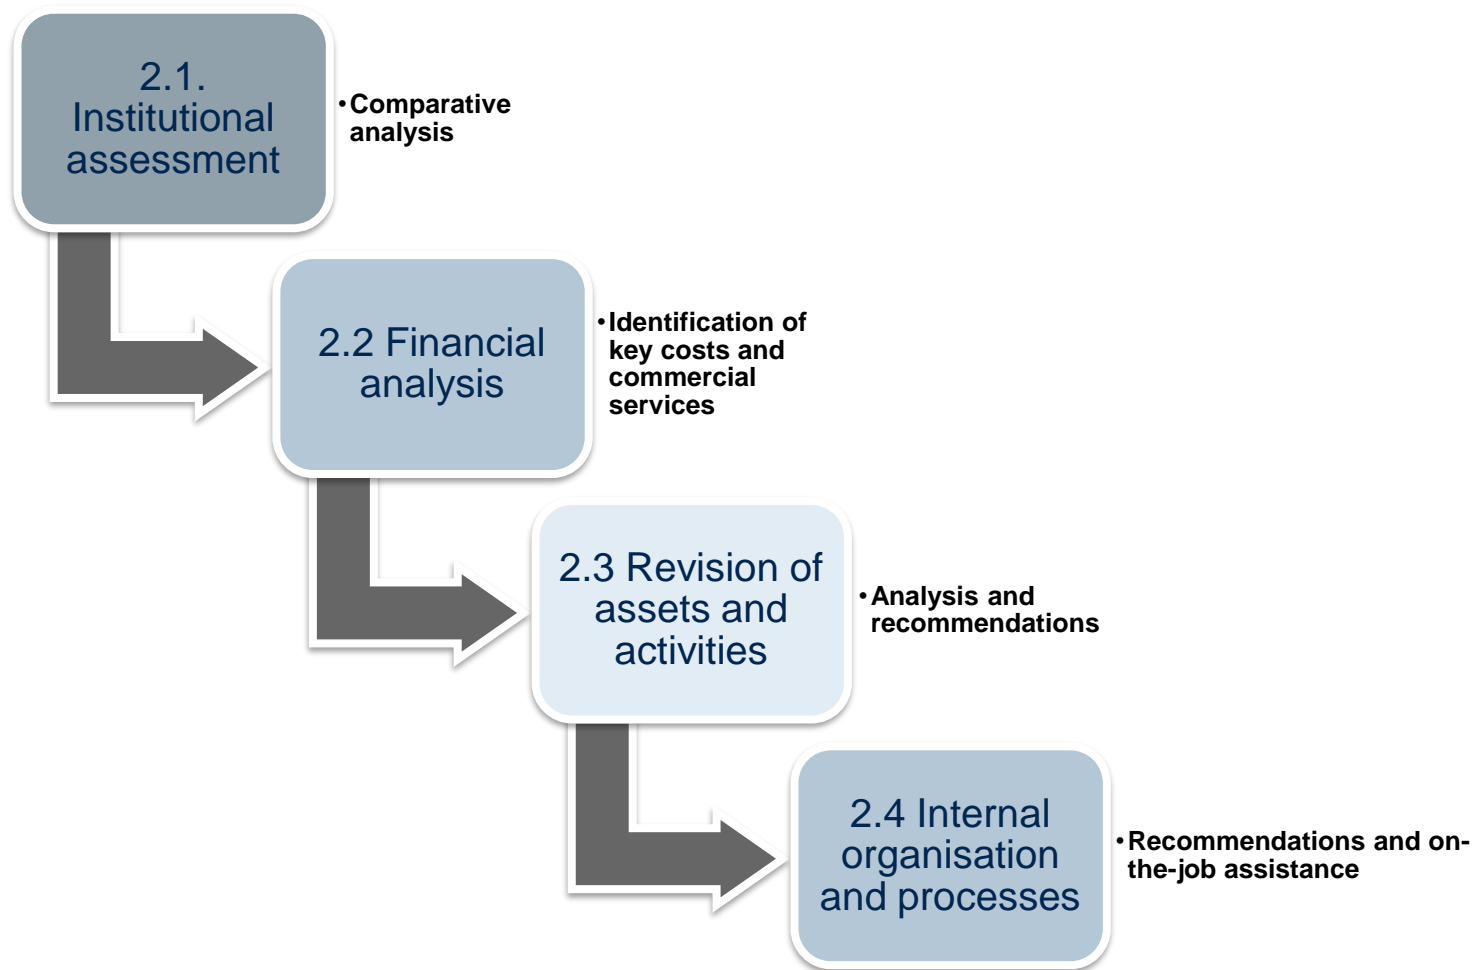

1.3. Preparation of amendments

- Assistance to the NSB / Government concerning amendments
- Dialogue with other legislative actors

Tangible outputs: Sound recommendations to amend the existing legislative framework. Practical support to implement the recommendations.

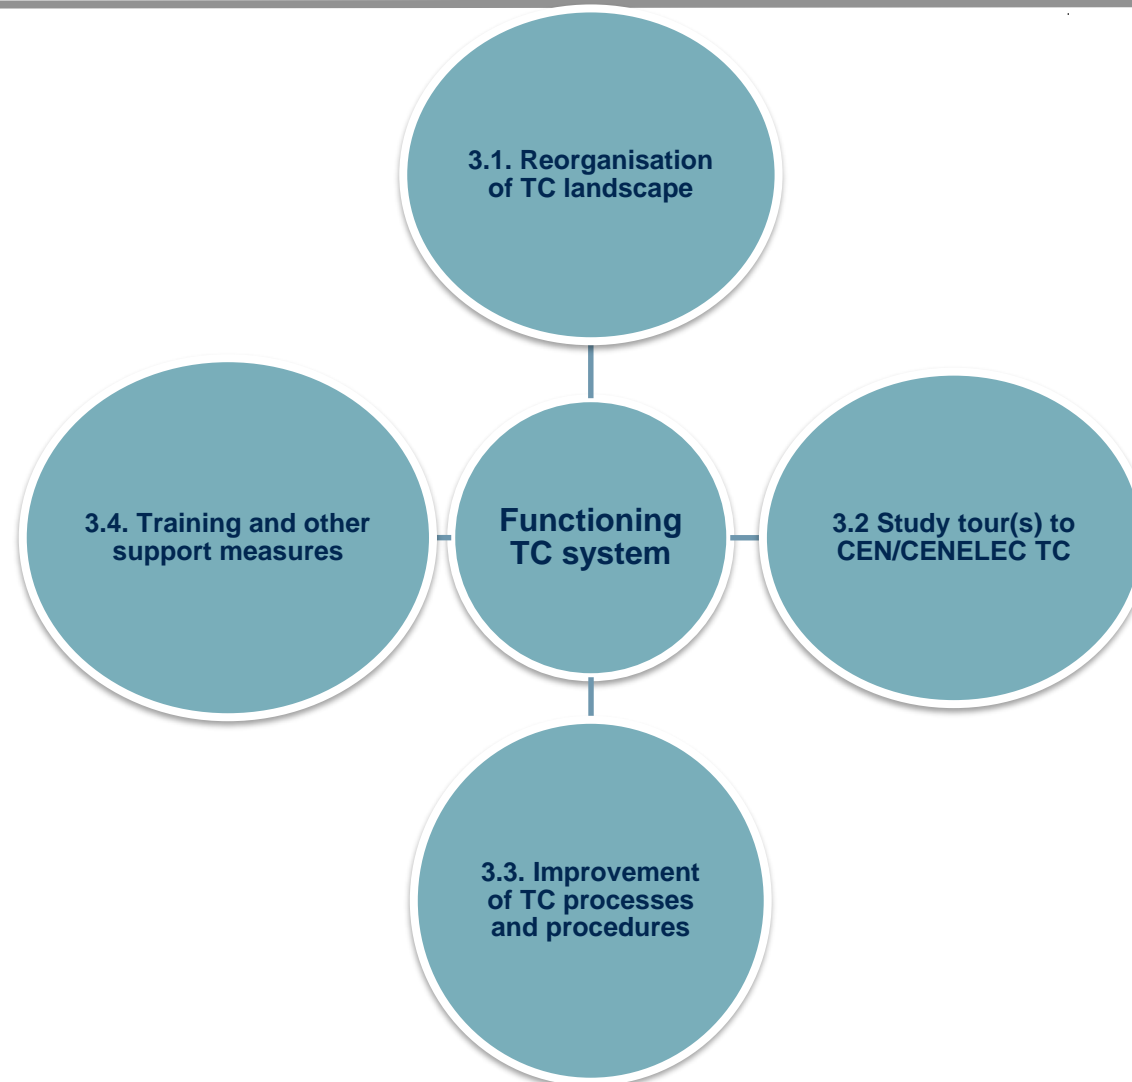

Component 2. Functional Organisation of the NSB

Tangible outputs: Definition of the scope of activities, services to develop and organizational structure. Market and financial analysis. Mission, vision and business plan.

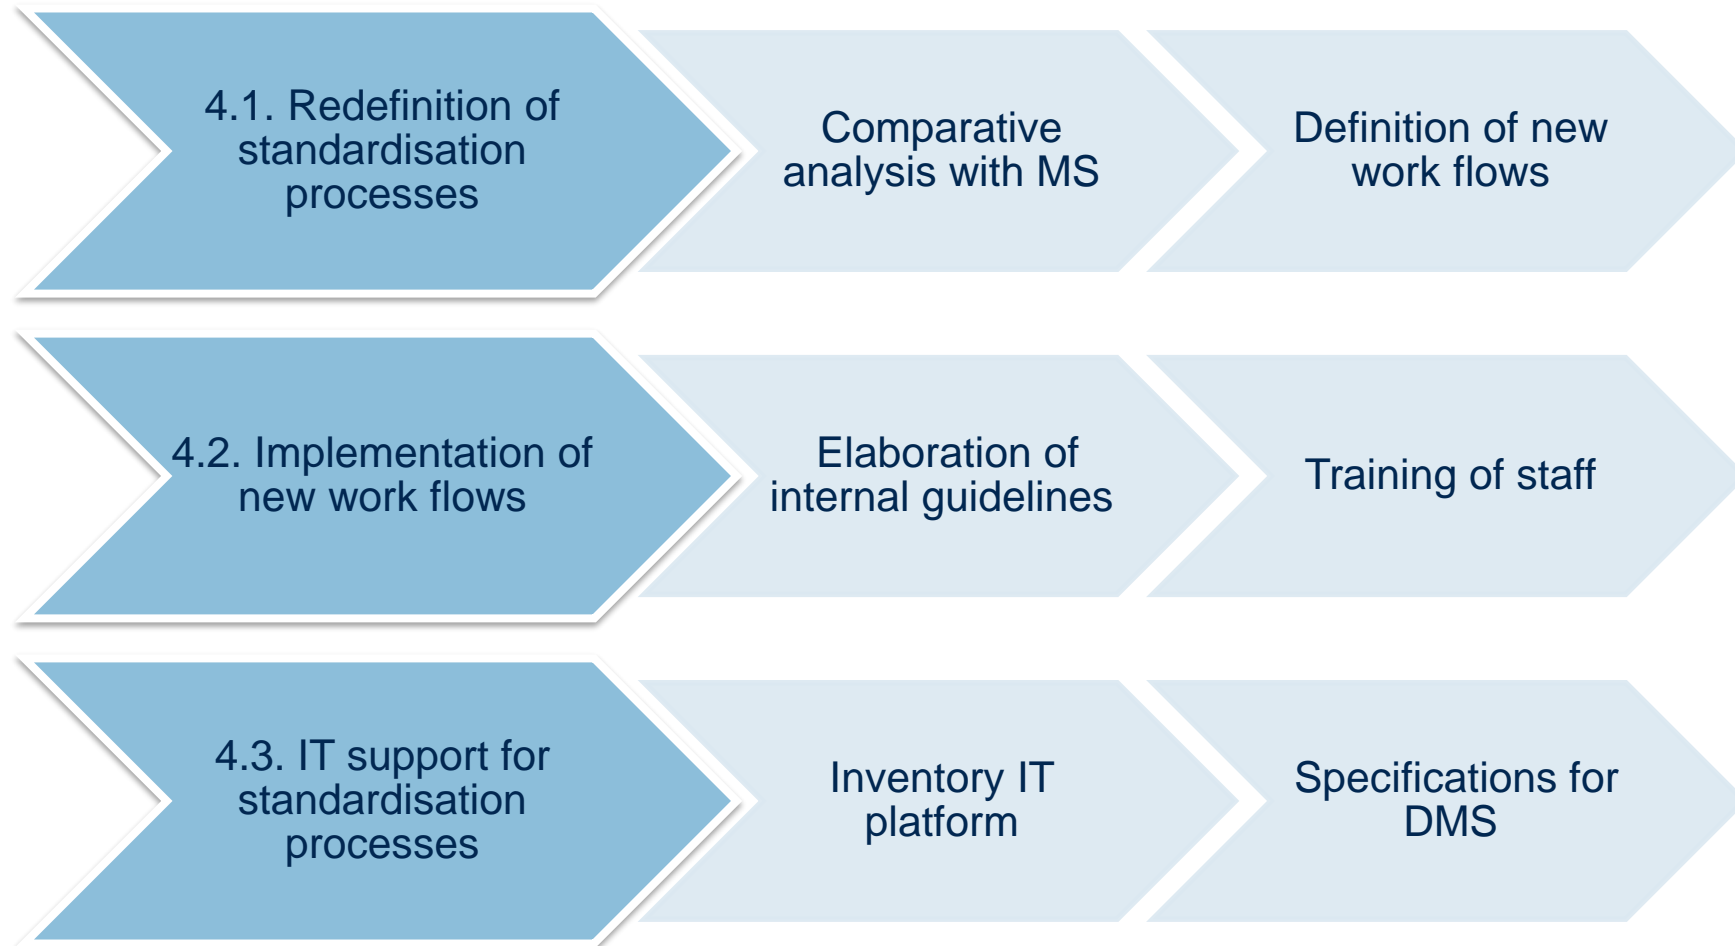

Component 3. Technical Committees Working Modalities

Tangible outputs: Ownership of TCs at the NSB; structure and scope of TCs according to international practice and to TCs existing at European and international levels

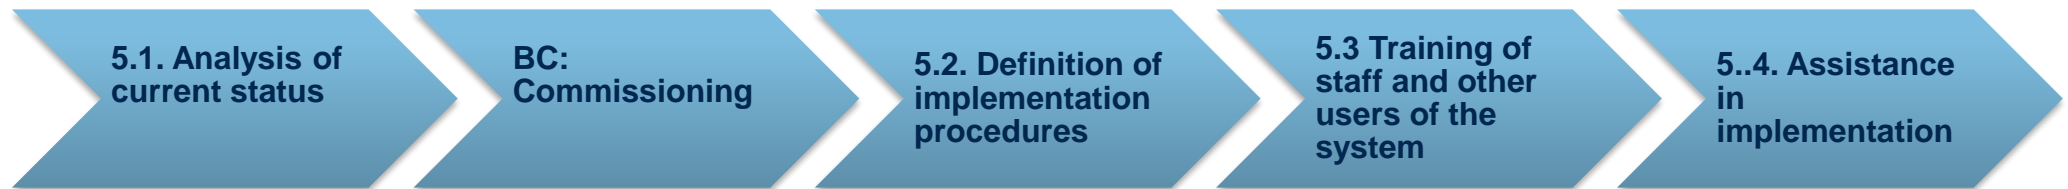

Component 4. Rationalization of Standardization Processes

Tangible outputs: Standardisation processes analysed, optimised and written down as internal guidelines. Specification for DMS available.

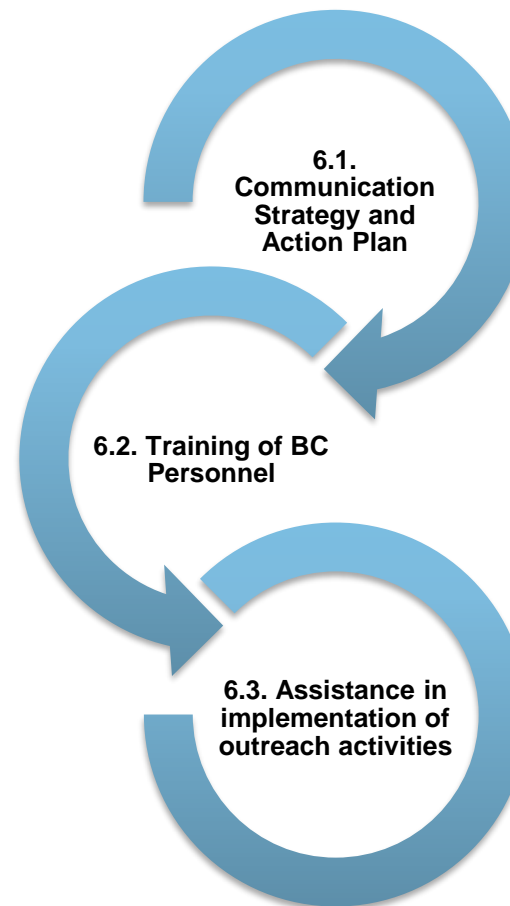

Component 5. Setting-up of the IT-supported Standards Translation System

Tangible outputs: efficient and effective use of tool(s), supporting the requirement of translation of a large number of standards, based on the implementation of well-defined processes and procedures.

Component 6. Development of an Outreach Strategy

Tangible outputs: Introduction of new services, awareness of standardization increased in Ukraine, trained staff at NSB.

Visibility + Sustainability – What Remains

The Ukrainian NSB will be in a strong position to

- Reach out to stakeholders (government, industry, users) and to respond adequately to market needs;
- Place standardization as a driver for economic development;
- Work closely with European and international bodies (due to MS Partners' key roles and responsibilities in policy, strategy and advisory groups);
- Implement EU standards in Ukrainian language (translation tool);
- Have a sustainable financial framework.
